Hearing aid accessories

Earmould Puffer

Useful for drying out condensation in the earmould and attached tubing.

Tubing Threader

Allows anyone to rethread the tubing in an earmould.

Wax Tool

A multi-purpose tool which includes a brush, wire loop and a magnet. Useful to help clean the earmould. The magnet can be used to help with fitting and removal of batteries.

Drying Kits

Because hearing aids are worn on the body, they absorb moisture internally which can sometimes cause damage to the hearing aids.

Drying out the hearing aids overnight will improve their reliability and help extend their life.

Drying kits are also suitable for keeping ear moulds and tubing dry.

Please ask your audiologist if you require any further information about the above or any other accessories.
