Dear Colleagues,

Since September 2009 the NIHR Cambridge Biomedical Research Centre has been hosting a monthly lecture, with each theme inviting a speaker in turn. These take place in the evening, starting at 5.00 pm at the lecture theatre in the CRUK Cambridge Research Institute and are followed by a drinks reception.

The Imaging team will be holding their lecture on Thursday 8th July 2010. Professor Bruce Hillman, Theodore E. Keats Professor of Radiology and Public Health Sciences at the University of Virginia where he was Chair of the department from 1992 until 2003, will deliver the talk entitled "***The Sorcerer's Apprentice - The Future of Medical Imaging***".

Bruce Hillman, M.D., FACR, now the chair and principal investigator of the American College of Radiology Imaging Network (ACRIN) and editor-in-chief of the Journal of the American College of Radiology (JACR). ACRIN is a consortium to generate, execute, and report on multi-center clinical trials in imaging as related to cancer, which has accrued more than 76,000 participants to imaging clinical trials and published significant papers in high-impact journals. To date, the network, for which Dr Hillman is the principal investigator and chair, has received \$192+ million in grant funding. Dr. Hillman is also a member of the ACR Board of Chancellors and a fellow of the American College of Radiology.

As a research scientist, Dr Hillman has published more than 160 peer-reviewed articles, 34 book chapters, 4 books, and two defining works on the utilization of imaging by non-radiologists, published in The New England Journal of Medicine and The Journal of the American Medical Association. Dr. Hillman is a former editor-in-chief of Investigative Radiology and Academic Radiology and a recipient of the George C. Marshall Memorial Fund Fellowship, the John A. Hartford Foundation Fellowship, and a Pew Memorial Trust Fellowship honoree.

Professor David J. Lomas. Professor Adrian Dixon and Dr John Bradley would like to invite you to join them for this event, on behalf of the NIHR Cambridge BRC. In order to have a good turnout for this event and make this a success, we would really welcome your support in passing this invite on to all relevant staff members in your department.

Yours sincerely,

Sylvie Robinson
