

# The Rosie Extension

## Project Newsletter – August 2011

### Construction Update

#### Main Extension:

We are delighted to announce that the final early morning concrete pour for the main building structure took place on the 30<sup>th</sup> August. The concrete frame for the main extension is now complete. Pre-cast concrete staircases have been installed and bricklaying for the external façade has commenced.

Internal walls are currently being constructed on level 1 and 2 and the work to install mechanical and electrical services will commence on the 12<sup>th</sup> September.

#### Connecting the extension to the Rosie Hospital:

Temporary walls have been constructed in some areas of the existing Rosie in preparation for the structural connections which will eventually link the extension to the Rosie Hospital.

We apologise for the inconvenience this has caused of this and thank staff and patients for their understanding whilst the work within the Rosie Hospital is undertaken.

#### Chariots of Fire 2011

The Chariots of Fire on 18<sup>th</sup> September is being held exclusively in aid of the Rosie Hospital Campaign. If you are able to volunteer or participate in this exciting event, please contact the ACT Campaign Office. Thank you!
